

Sustainability starts from your concrete choices

The Vision of GERBALDO POLIMERI, a company committed since 1985 in the recycling of plastics, identifies the prospect and future of the plastics market in sustainability. The GECO project was born from the partnership of two companies, ECOPLASTEAM and GERBALDO POLIMERI.

Through innovation and R&D activities, GERBALDO POLIMERI used Ecoallene by Ecoplasteam – a revolutionary material from the recycling of poly laminates deriving from carton of beverages, confectionary wrappers ecc - as a starting point for developing high tech products dedicated to rotational molding.

Geco products

GECO are unique products, deriving from an exclusive technology able to meet the needs of the rotational molding market, that is increasingly aimed at sustainability.

All GECO products are characterized by a green mottled colour as the gecko animal, representing a nature-friendly line that maximizes sustainability through recycling, decreasing the use of fossil bases and infinite recyclability.

Quality and certifications

Geco is a guarantee of standard quality:

- ISO 9001:2015
- ISO 14001:2015

All Geco products boast the certification Plastic Second Life (PSV).

2 Kg
Geco rotomoulded

25 milk cartons from waste

EcoAllene® based powder technology

Product line

GECO 30

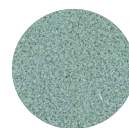

the best choice for mechanical performance.
