NEW RE-GENERATION OF PLASTICS

# NEW RE-GENERATION OF PLASTICS

*ANEMOS joins Gerbaldo Polimeri S.p.A.  
green product family*

Reliable source  
according to circular  
economy musts

Reduce at least  
30% picking  
of fossil based  
materials

Reuse of at least  
30% plastics  
from waste

**GERBALDO**  
POLIMERI

## Anemos

Starting from **PE obtained from "post-consume"** selection, Gerbaldo Polimeri S.p.A. invested deep knowledge and experience, developing a compound with different possible concentrations of **second life material**, giving birth to the ANEMOS family. Allowing the obtainment of a wide range of colours, ANEMOS is applicable both in **ROTO and BLOW Moulding**, providing consistent quality standards in the final product.

# άνεμος

Coming from ancient Greek "*ánemos*" meaning "*wind*", the name is meant as *innovation spirit, technological evolution always with an eye onto the full respect of sustainability, thanks to the perpetual recyclability of the product, perfectly suiting the circular economy concept.*

## Colours

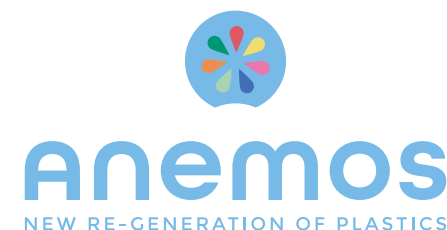

ANEMOS allows a **wide selection of colours on request**, considering the possible minimum difference in colour between batches, that is a peculiarity of recycled materials.

## Certifications

Continuing the innovative path started by Gerbaldo Polimeri with GECO family, ANEMOS aims to solve the stringent implication of limited availability of good and consistent quality recycled plastics.

Thanks to this new product family, available quantities are relevant and potentially increasing over the time. Relying on the **Plastic Second life (PSV) certification UNI EN ISO 15343** (Plastica Seconda Vita), it is now possible to obtain state of the art **recycled plastic based products both in ROTO and BLOW**.

The Vision of GERBALDO POLIMERI,  
a company committed since 1985 in  
the recycling of plastics, identifies the  
perspective and future of the plastics  
market in sustainability.
